ANNUAL PRICE LIST

NEWER GLADS

Spring 1943

EVERETT CLARK

POQUONOCK, (WINDSOR) CONNECTICUT

FOREWORD

Although the future is uncertain and many changes may occur before spring, I am sending out my price list as usual. The same low prices prevail, even though, labor and material have increased to no small extent.

Last year was a wonderful growing year and my bulbs are especially nice. I know you will want to increase your stock of bulbs should you already possess some. If not be sure to try a quantity and see what splendid results will be yours.

Buy to Try — Try to See — See to Believe.

Terms: Single bulbs or bulblets at the ten rate, but no single item for less than five cents. 25 bulbs or bulblets at the 100 rate; 250 at the 1,000 rate. Pints and half pints in generous measure at the quart rates. Prepaid spring delivery on all orders over \$2.00 — except for F. O. B. prices.

Cash, please. With the following extras of your selection: On orders up to \$5.00 you may select 10% in extra bulbs; \$5.00 to \$10.00, 15% in extra bulbs; \$10.00 to \$20.00, 20% in extra bulbs. Over \$20.00, 30% in extras. If you purchase large bulbs only in lots of 25 or more and will call for them or pay express charges, you may take a cash discount of one-third instead of extra bulbs. The above extras and discounts do not apply to F. O. B. quotations. Gratis bulbs for the names of your glad-loving friends.

Stock of bulbs for 1943 guarantee the same bright, clean, healthy stock as usual.

NEWER GLADS - Spring 1943

This year, I have a number of extra large jumbo bulbs. If you wish these bulbs, specify, and send your order in early. The bulbs I prefer to grow myself and will use in filling orders are plump, high crowned stock grown from bulblets or small planting stock. (L) large, (M) medium, and (S) small sizes are those common to the trade. Large bulbs can be depended upon for the finest spikes. Medium size bulbs will prove very satisfactory. Small bulbs may do well. Varieties in the 40-25-15 range, such as Aflame, Aida, Yvonne, may also be purchased in standard sizes per 100 as follows: No. 2, \$2.40; No. 3, \$2.00; No. 4, \$1.50; No. 5, \$1.00; No. 6, 60c; prepaid delivery.

Gladioli are very easy to grow. Following are a few of the principal rules to follow:

Select a place in the open garden where other tall growing plants will not shade them. Glads like and need full sunshine. Mix with the soil, any good grade of commercial fertilizer or well rotted compost or manure. Select good healthy bulbs. Place them in a trench at least five inches deep and about three inches apart in a straight or staggered row. Cover at once. It is better to plant deeper than too shallow. One or two light applications of fertilizer during the growing season, before buds appear, will help insure good spikes.

Join the Connecticut Gladiolus Society if you live nearby. You will be warmly welcomed by its members. Send the dues of \$2.00 to me and I will be glad to forward them to the Secretary.

SATISFACTION GUARANTEED

Successful control measures include the following:

(1) Treat the bulbs with Cyanogas-G or other fumigant upon cleaning the bulbs in the fall. Small quantities of bulbs may be put in paper bags or shoe boxes and sprinkled with Naphthalene flakes—1 ounce per 100 bulbs. Let the flakes evaporate. (2) Store in a cool, dry place and keep at a temperature of 40 degrees. Do not let the bulbs freeze. (3) Treat or soak in solution of bichloride of mercury (corrosive sublimate) before planting. Husk the bulbs previously, if possible. Soak for two hours in a solution of 1.1000. one tablet to one pint of water. Use stone crocks, glass jars, or wooden tubs—not a metal container. Large numbers of bulbs may be tied in sacks and kneaded on the floor in lieu of husking. Thorough soaking will destroy all thrips and their eggs. (4) Spray every week or ten days after the plants are six inches high. Do not wait until the buds appear. It is too late then. Effective spraying will control those thrips that have survived or that may appear from nearby infestations.

Tartar Emetic, used as follows, has proven very satisfactory in controlling thrips. Tartar Emetic 4½ teaspoonsful, sugar 1 2/3 cups, water 3 gals. Apply late in the afternoon or early evening.

Among the newer ones. The following information, which I am passing on to you, is from my own experience in growing these varieties. It is necessary to grow each variety several seasons and on different soils before giving a real estimate of its merits. I will try to explain with Amberglow. I have grown this variety four seasons, the first two on light soils and the last two on heavy. The first years it crooked badly about 75% but the past two seasons it has cut about 95%. The color is good. We need it. Now Aladdin I have grown on all soils but it is still too short. Buffille is far ahead in this color class. Camillia is short with me. Capeheart is tall, straight and opens nicely. Crystal is large and white but too hard to handle. Del Ray was a giant and made huge spikes. Flora Farmer doesn't do well for me. Jasmine is nice, but not a commercial. Josef Haydn was the tallest blue. Nearly six feet. Magnolia is a beauty. Mother Kadel looks very promising. Myrna was in good demand as a cutflower. Rima, while not new, was gorgeous. Rosa Van Lima is a must have, whether you grow a few or a lot. Sensation is a giant but too late. Shirley Temple still crooks terribly, especially from large bulbs. While Snow Princess has Larger flowers than Maid of Orleans it did not grow as tall or open as many flowers. Timbuctoo is rather short but opens a lot of flowers. Tunias' Triumph fades too easily. Valeria is the red to replace Dr. Bennett. White Gold while not a commercial is well worth watching.

I am not listing Coral Glow this year. My stock has become mixed with a light pink, which I do not know. It's not much of a flower. If you were one to get this last year, please let me know and I will be glad to replace it.
